

# Small is Beautiful House

The *Small is Beautiful* House is a private residence that was custom built by a local real estate agent and her husband. This couple knows all the ingredients that make a good house, and they designed and built it from the ground-up to meet the needs and values of their family. The home is nestled into a small "infill" lot within a heritage neighbourhood of Galt, Cambridge. Its proximity to downtown amenities and schools is convenient and encourages walking, biking and/or using public transit, which was very appealing to the homeowners. This home has many green features and models how a small home can be comfortable, stylish, and very efficient.
